

Register:

- From here they must insert their email, a password of their choice, and their first and last name.
- After inputting the data, they can click "Create Account" to begin using the app.
- After either signing in or registering, the user will be taken to the home screen.

Login:

- If the user already has signed up, they may simply input their email and password and press "Sign in".
- If they do not have an account they will have to press register which will take them to a signup page.

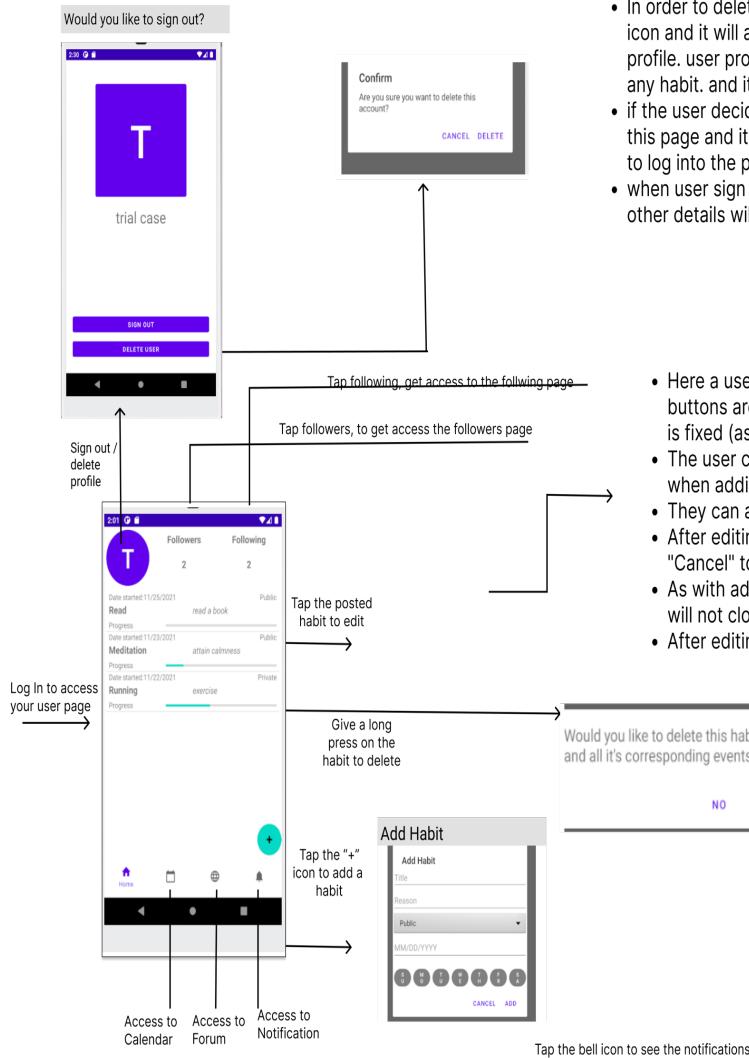

Log In to access
your user page

Share Location:

- When a user logs in for the first time, they will be asked for permission to get their device's location. The user will only be asked this once, upon subsequent sign ins on the same device this screen will be skipped.

Home:

- On this screen, the user will see their user id, followers, following, a list of their habits (if any), a floating action bar, and a navigation bar on the bottom.
- To add a habit, the user may press the floating action button with a plus, which will take them to the addHabitFragment.
- From here the user may input data for a habit, following the prompts on the screen. If any of the fields are left blank or weekdays and dates are not picked, clicking "Add" will result in the dialog staying open and error messages popping up.
- Once properly added, the new habit will be shown on the home screen along with any previous habits. Upon clicking a habit in the list, the viewEditHabitFragment will open.

- In order to delete the user profile, simply click on the "delete user" icon and it will ask the user for confirmation as shown in delete profile. user profile from the app and will not keep any record of any habit. and it will redirect to the "Log In" screen.
- if the user decide to switch the profile, they can sign out from the this page and it will redirect to "Log In" screen and they will be able to log into the profile they would like to access.
- when user sign out from profile, their habit/habit events, every other details will be saved. it will keep the record

- Here a user can see a dialog very similar to add habit except that all the fields and buttons are set according to the information the habit already has and the date started is fixed (as per the instructions from the lecture).
- The user can choose to change any of these values in the same way they set them when adding a habit except for the date started.
- They can also choose a new position for a habit in the list.
- After editing, the user may press "Save" to save any of the new values entered or "Cancel" to return to home.
- As with adding a habit, if "Save" is clicked and a field has been made blank, the dialog will not close, and error messages will pop up.
- After editing, the changed habit will appear on the home screen.

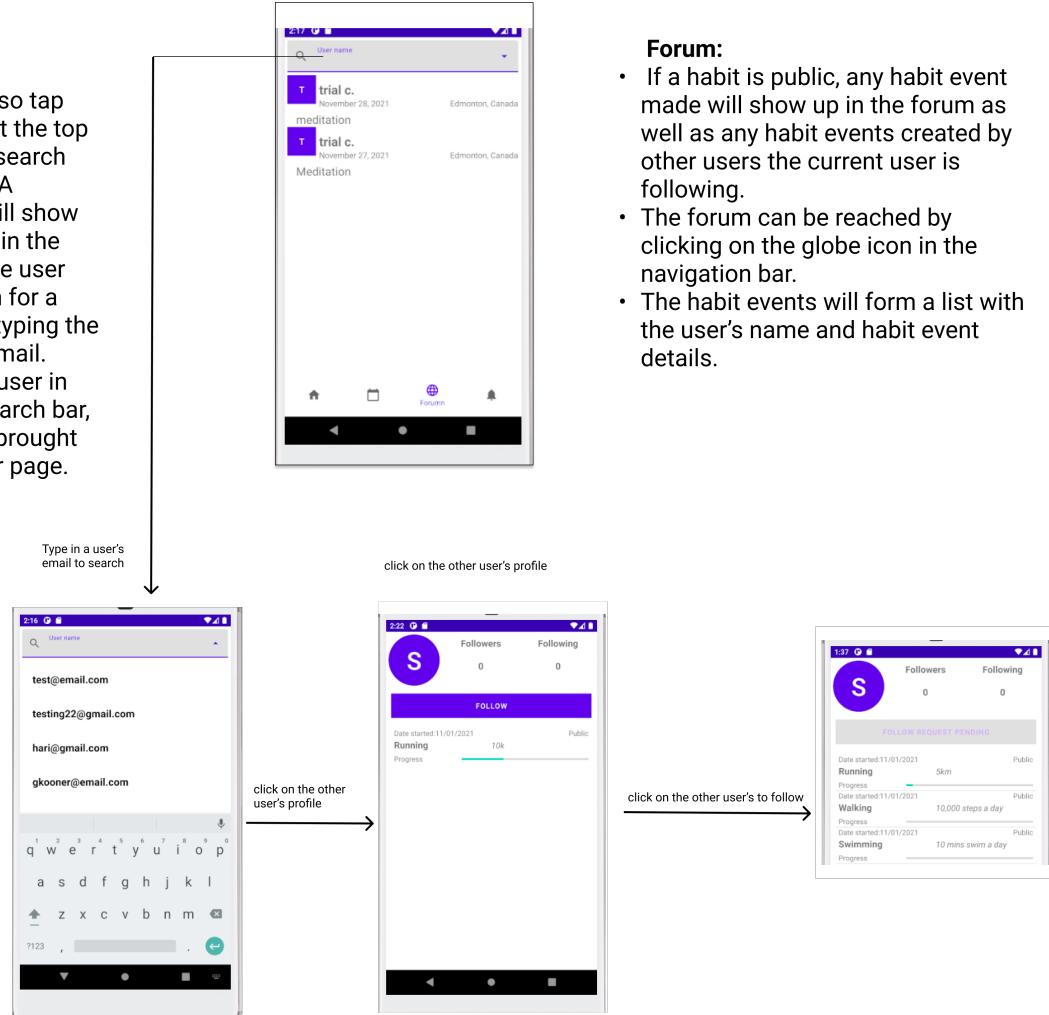

- A user may also choose to delete a habit by long clicking a habit in the list.
- After a long click on a habit, the deleteHabitFragment will open asking for confirmation of deletion.
- To get to the calendar, forum or notification section, the user may click the respective icon in the navigation bar.

Calendar

- The screen is divided into two halves here.
- The first half of the screen indicates the habits that are planned out during that day.
- The user can add a completed event for the current day.
- These completed events are now shown in the second half of the screen.
- These events can be viewed, modified, or deleted at any time.

- The user may also tap the search bar at the top of the forum to search for other users. A dropdown list will show users who exist in the database, but the user may also search for a specific one by typing the desired user's email. Upon tapping a user in the list of the search bar, the user will be brought to the other user page.

Forum:

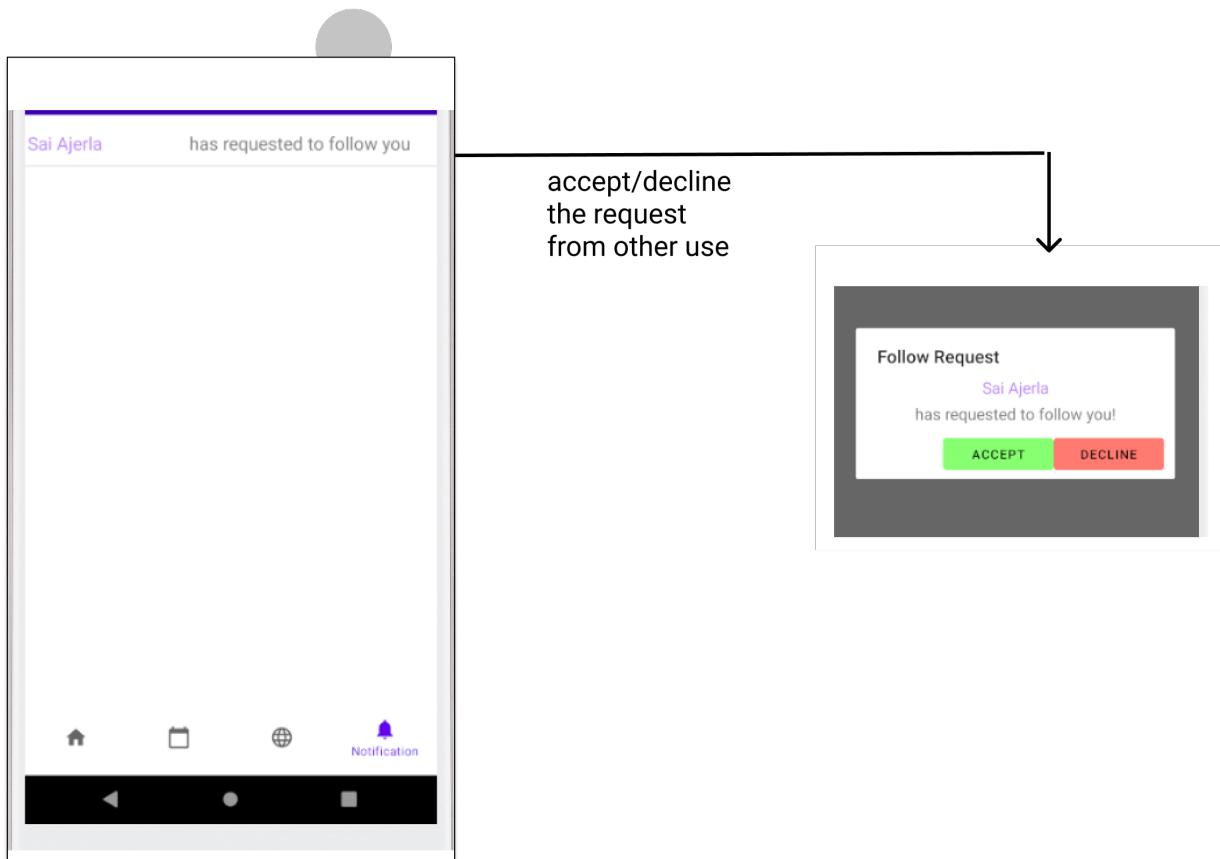

- If a habit is public, any habit event made will show up in the forum as well as any habit events created by other users the current user is following.
- The forum can be reached by clicking on the globe icon in the navigation bar.
- The habit events will form a list with the user's name and habit event details.

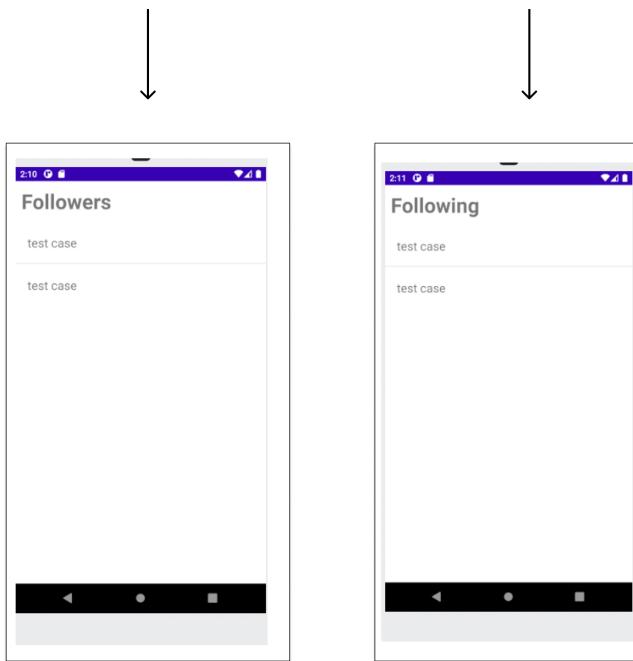

Other User Screen:

- This screen will show another user's profile with all of their information and public habits very similar to the Home page.
- There is also a follow button on the page which will display either "follow", "unfollow", or "follow request pending" based on whether the current user is already following them.
- If the other user has already received a follow request from the current user, the button will not be clickable.
- Otherwise, the button will either send a follow request or unfollow the other user.

Notifications:

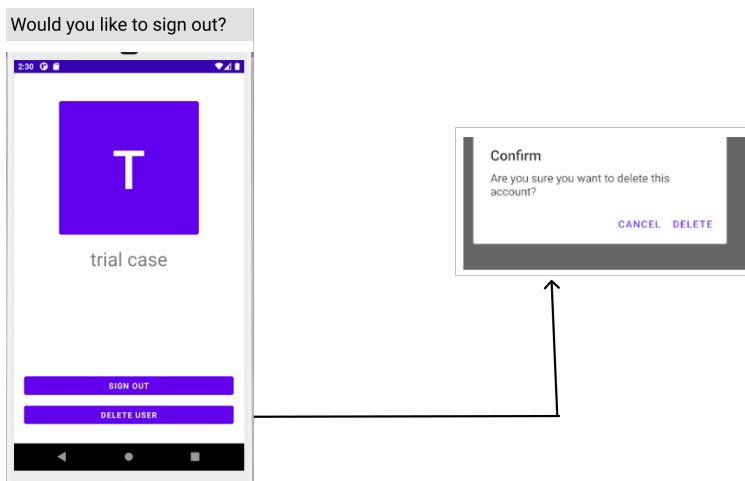

- From here they must insert their email, a password of their choice, and their first and last name.
- After inputting the data, they can click "Create Account" to begin using the app.
- After either signing in or registering, the user will be taken to the home screen.

Follow/Following Lists:

- From the home page, the user may click on the following or follow count to see a list of the users who are on the corresponding list.
- From this list, the user may tap on an item to be brought to the other user screen for that other user.

Log Out/Delete Profile :

- User will be asked to log out or either delete the profile.
- while logging out, all the information will be securely saved.
- When user decide to delete the profile, all the content will be erased from the profile and there will not be any access left. User have to set up another profile.
